Dr Retsina--

I am so sorry I have not replied sooner. I look forward to learning more about your project. I divide my time between Ann Arbor and Washington and can meet you wherever it is more convenient. It is best to have your office work with my assistant Gwen Stewart, who manages my calendar.

Regards,

Chris Grunder

Subject: From American Process, RE: introduction

Dear Mike

Thank you for the introduction.

Dear Chris,

It is a pleasure to meet you via email. Last year we visited with Paul and Margo and gave them an overview of our Alpena Michigan biorefinery. Paul and Margo were extremely helpful as we finalized our RIN qualification process. We are now in the last stages of startup and hope to very soon be selling cellulosic ethanol from that facility.

Kim Nelson, our environmental compliance VP and I would appreciate the opportunity to visit you in DC and meet with you and Paul, update you on our project, the production expectation, our feedstock and our projected RIN generation.

Please let us know if some time in the coming weeks is good for you for short meeting. In the meantime, please do not hesitate to contact me or Kim if there is additional information we may provide.

My best regards

Theodora Retsina

Chris: Hope you are well. The collective Neste Team are in town on October 10 and would love to have a visit with you about their current successes bringing renewable diesel into the United States this year. I suspect somewhere near 200 million gallons. They tell me they are not looking to talk about palm oil or any other controversial issue. They are pretty much open from 8 to noon on the 10th of October if you have an interest in meeting with them. Of course Neville Fernandes will lead the team of three. The CEO, the COO and Neville. I will be out of town and not be able to participate. Thanks for your consideration. All the best.

Tom,

Thanks for the note. I am going to forward you two emails with data and questions we shared with Solazyme to give you an idea of where we are with the lifecycle GHG determinations.

They include a couple of spreadsheets that should answer some or most of the questions you have below.

We should also talk through this. We seem to be a little stuck on the calculations which we need to finish before we can start thinking about pathway and feedstock questions.

I am free at 2:00 PM today or else all morning tomorrow is open.

Thanks.

- Vince

To: Camobreco, Vincent
Cc: Argyropoulos, Paul; 'Michael J. McAdams'
Subject: Time for a short phone discussion

Vincent,

Thanks for your time today and the excellent guidance provided.

I would like to enhance my understanding on several issues related to mass & energy balance and the range of GHG reductions related to the following topics:

- Energy consumption range for
 - Sugarcane to sugar (sugar mill)
 - Sugarcane sugar to ethanol
 - algae oil (triglycerides) to Fame
 - Algae oil (triglycerides) to Renewable Diesel/Jet by hydro-processing.
- Range of biomass fired steam boiler efficiencies
- Range of efficiencies for steam turbine generators

I know I am asking a lot but this would greatly help me develop a pathway without focusing on one type of boiler and turbine. I realize that once a pathway is establish that the Part 80 registration Mass & Energy Balance will determine if the actual facility equipment will deliver the required efficiencies to meet the requirements of the pathway.

Again thank you for your guidance today and in the past

Tom

Subject: Meeting Request for Next Week - Wednesday Sept. 18

Chris, Paul and Karl:

We will have a small group of high level CEO's in DC next week Wednesday, Sept. 18

Do the three of you have 30 minutes to meet to discuss biodiesel issues?

Clearly our team is concerned about the RVO ... but some face time with you Chris, and our team, might go a long way.

Please let me know.

Thanks

I anticipate we will have the following:

Joe Jobe, NBB CEO

Dan OH, REG

Mike Livergood, ADM

Gene Gebolys, World Energy

Martin Beirne, Green Earth

Michael Whitney, Loves!Musket

We appreciate it ... and thank you

Larry,

4 to 4:30 is the only time open. Are you still want to meet with just Karl and I? Seems we've already had quite a few rendezvous recently.

Let me know

Paul,

Can we lock this in for an early afternoon meeting on Wednesday?

Hi Larry

Given that Chris is unfortunately not available, I can check in with Karl and see if we might have a small 30 minute window to visit with you. What days are you looking at so I can consult with Karl.

Thanks, Paul
